It's exciting because you can prototype with littleBits and then when you have a 'keeper' you can automagically transfer the design to PCBDirect and VZ-Bits.

VBB is for Physical Computing Education With a strong emphisis on self-education for the Arduino community - artists, designers, hobbyists and anyone interested in creating interactive objects or environmentslittleBits are a great way to get started with learning about electronics and with the Virtual Breadboard littleBits module it's even easier especially for those on a budget or you want to play with modules you don't have your hands on yet.

It's all plug and play! No soldering, no schematic's , no layout's just pure open hardware hacking fun!!There will be a follow up kickstarter to back the creation of the physical VZ-Bits so look out for that also.. I am out of time today to explain but basically your littleBits designs map directly the VZ-Bits with a PCBDirect PCB automatically created to handle the wiring..
